## Key:

Blank fields mean the site didn't state a value or I haven't check (mostly the former)  
- Means They don't state y&n means, you should check the TOS.

## About Hostgator

Host gator have listed in there Terms that you can NOT have IRC on there. But I talked to Jay in sales and thats the terms for shared hosting. Here's out conversation:

Jay: Welcome to HostGator, how may I assist you?

Alex: Hi in the TOS links from the dedicated server form it says we may not use more than 25% of the servers resources.. is this a mistake?

Alex: As this is why I would be buyin a dedicated server.. to use that much resources

Jay: No no, this is only for shared servers.

Jay: Dedicated is your box completely.

Jay: You can use 150% if you wanted. :)

Alex: oh, can I get a copy f the Terms of service for dedicated?

Jay: Theres really no terms other than the general terms.

Jay: The server is leased to you basically.

Alex: ok

Jay: You have full control over anything you do with it.

Alex: Thanks for your time Jay

Jay: The only thing that is not allowed are game servers.

Jay: Other than that, you are free to do anything.

Sounds a bit of an armature show to me..
